

How to add an application to Intune-managed devices (Win 32 App)

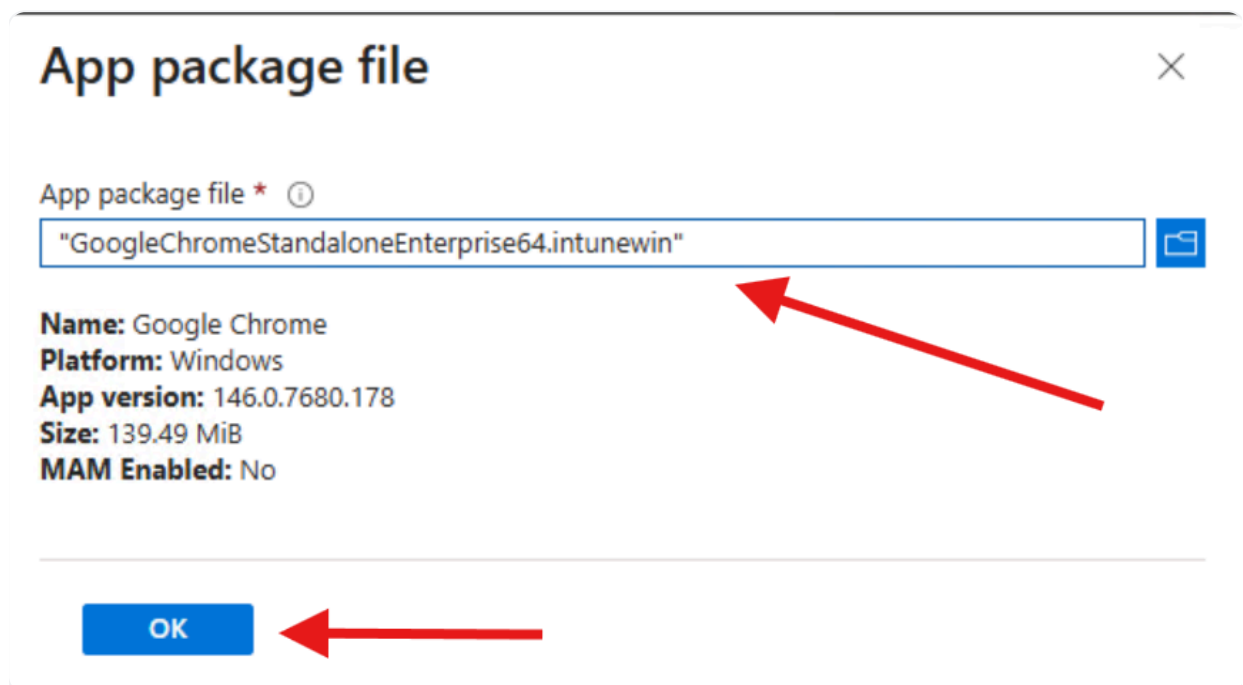

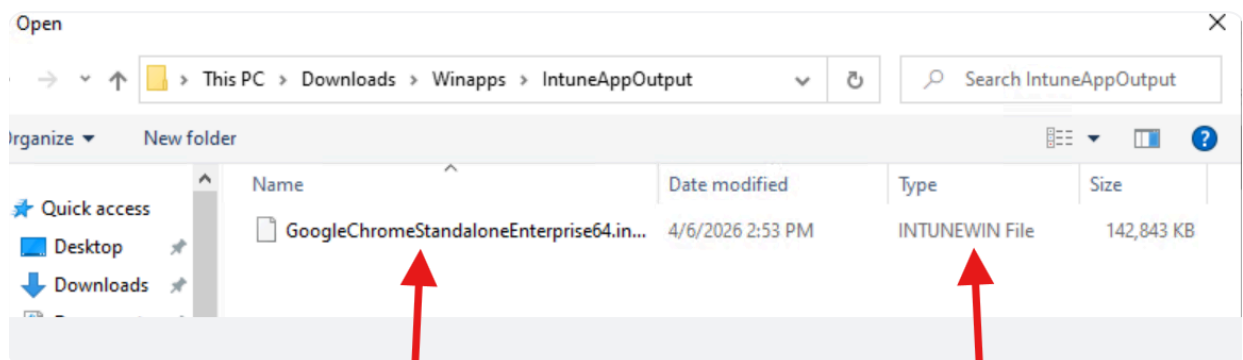

First sign in to the **Microsoft Intune admin center**, navigate to **Apps > All apps > Create > Add**,

Search for your Application Execution File.

Here we have "GoogleChromeEnterprise" this has been converted into a "INTUNEWIN" file

Select **"OK"** Then Click **"Next"** after providing App Information

Home > Apps | All Apps

Add App

Windows app (Win32)

Name * ⓘ

Description * [Get help with markdown supported for descriptions.](#)

Preview

Publisher * ⓘ

App Version ⓘ

Category ⓘ

Show this as a featured app ⓘ ☐ Yes ☒ No

Information URL ⓘ

Next We will provide how we choose to install this application on our organizations Computers

We will not allow the Device to Restart after installing the app for this demo

Add App

Windows app (Win32)

Uninstaller type ⓘ Command line ▼

Uninstall command * ⓘ msiexec /x "{6939CB9C-515D-372C-AF4A-BA8D6A40CC4B}" /qn ✓

Installation time required (mins) ⓘ 60

Allow available uninstall ⓘ Yes No

Install behavior ⓘ System User

Device restart behavior ⓘ No specific action ▼

Specify return codes to indicate post-installation behavior:

Return code	Code type
0	Success ▼
1707	Success ▼
3010	Soft reboot ▼
1641	Hard reboot ▼

Here We will Specify a **"Manual"** Rule to add Our Specific **.MSI** Install File.
The Code will Auto Populate Then select **"No"** for Product Version checks

Hit **"Next"**

✓ App information ✓ Program ✓ Requirements **4 Detection rules** 5 Dependencies 6 Supersedence

Configure app specific rules used to detect the presence of the app.

Rules format * ⓘ Manually configure detection rules

Type	Path/Code
MSI	{6939CB9C-515D-372C-AF4A-BA8D6A40CC4B}

[+ Add](#) ⓘ

Detection rule

Create a rule that indicates the presence of the app.

Rule type ⓘ MSI

MSI product code * ⓘ {6939CB9C-515D-372C-AF4A-BA8D6A40CC4B}

MSI product version check ⓘ Yes **No**

We wont add any **"Dependencies"** - This says **"To install this application I need this Application to be here first"** It requires a Dependence on Another app to be there before Installing. If you feel you want that then add further info.

For us **"Next"**

✓ App information
✓ Program
✓ Requirements
✓ Detection rules
5 Dependencies
6 Superintendence

Software dependencies are applications that must be installed before this application can be installed. To automatically install a child dependency app before installing the current parent app, enable the automatically install option. To only install the current parent app if the child dependency app is already detected on the device, disable the automatically install option. There is a maximum of 100 child dependency apps, including references to other apps outside of this view, forming a graph of apps. The total size of the dependency app graph is limited to the maximum of 100 plus the parent app (101 total). [Learn more](#)

Name	Automatically Install
