

How to add/remove IOS Devices to Intune and add Compliance policies

Before we begin please make your way to the "Microsoft Intune Admin Center"

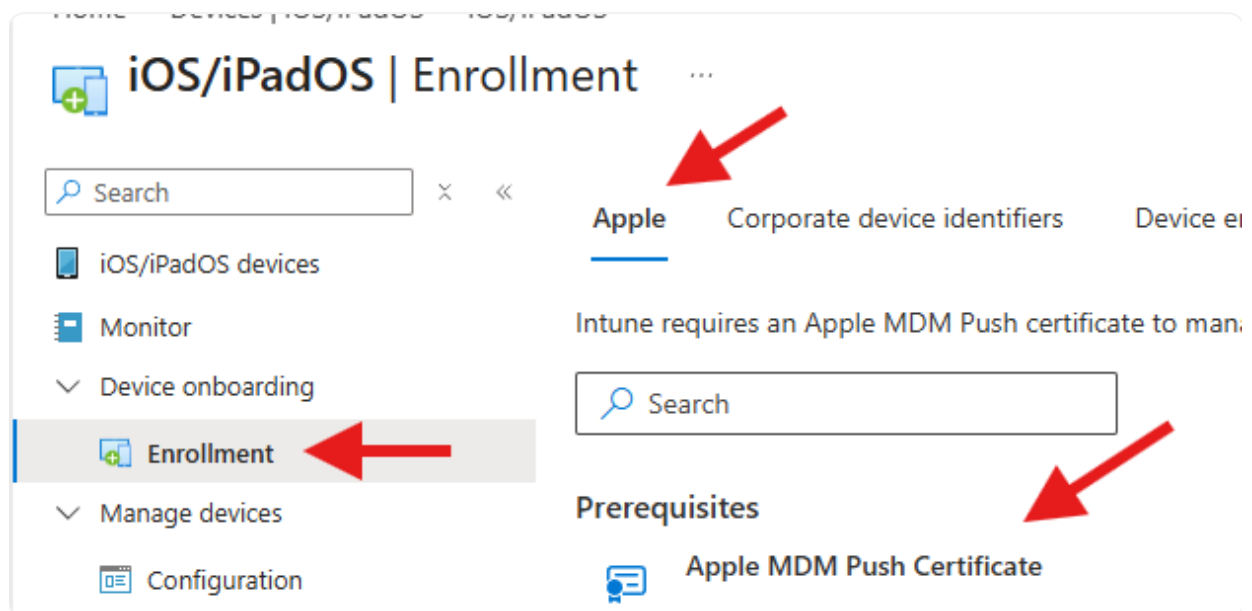

<https://intune.microsoft.com/>

Once at the "Homepage" Select "Devices" - In Device | Overview - By platform - "iOS/iPadOS" Under "Device onboarding" Select "Enrollment"

To allow for **Apple iOS** devices to be managed through "Intune" first they must receive a **"MDM Push Certificate"** **"Create the Push Certificate" with an Apple ID**

On the **Right-hand side** of your browser Pane you will find your **Certificate Creation Instructions**

Configure MDM Push Certificate

 Delete

Steps:

1. I grant Microsoft permission to send both user and device information to Apple. [More information on Microsoft permission.](#)

☒ I agree. *

2. Download the Intune certificate signing request required to create an Apple MDM push certificate.

[Download your CSR](#)

3. Create an Apple MDM push certificate. [More information on Apple MDM push certificate.](#)

[Create your MDM push Certificate](#) 

4. Enter the Apple ID used to create your Apple MDM push certificate.

Apple ID *

5. Browse to your Apple MDM push certificate to upload

Apple MDM push certificate *

Upload

Step 2 Download the **"CSR File"** from the given Hyperlink

IntuneCSR.csr

4/9/2026 3:09 PM

CSR File

Step 3. Click the **"MDM Push Certificate Hyperlink"** Create an **Apple push Certificate**

Apple Push Certificates Portal

Get Started

Create a push certificate that enables your third-party server to use Apple Push Notification Service and your Apple devices.

Create a Certificate

Add the "IntuneCSR.csr" to "Create a new push certificate"

Apple Push Certificates Portal

Create a New Push Certificate

Upload your Certificate Signing Request signed by your third-party server vendor to create a new push certificate.

Notes

Vendor-Signed Certificate Signing Request

Choose File

No file chosen

Cancel

Upload

Now download your Push Certificate

Apple Push Certificates Portal

Confirmation

You have successfully created a new push certificate with the following information:

Service	Mobile Device Management
Vendor	Microsoft Corporation
Expiration Date	Apr 9, 2027

[Manage Certificates](#)[Download](#)

Next, add your brand new "**Microsoft MDM File**" then select "**Upload**"

×

Configure MDM Push Certificate

Delete

Steps:

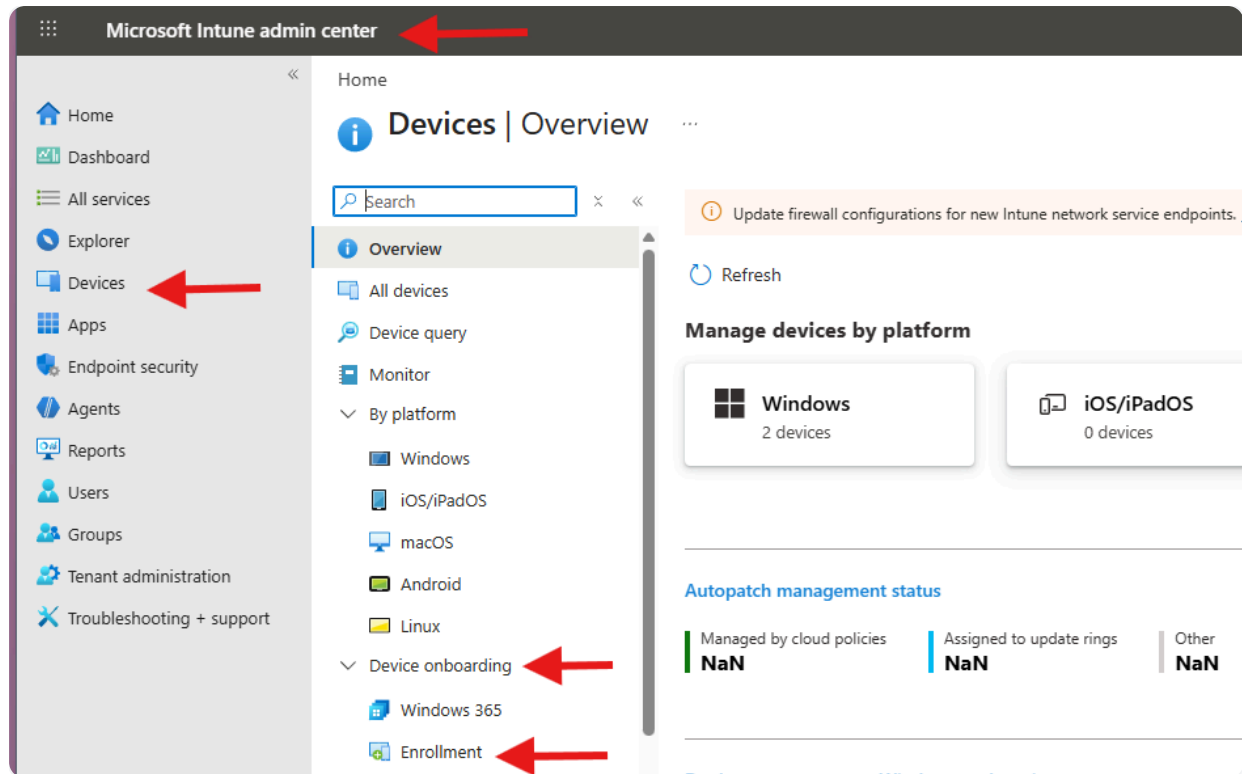

- I grant Microsoft permission to send both user and device information to Apple. [More information on Microsoft permission.](#)
☒ I agree. *
- Download the Intune certificate signing request required to create an Apple MDM push certificate.
[Download your CSR](#)
- Create an Apple MDM push certificate. [More information on Apple MDM push certificate.](#)
[Create your MDM push Certificate](#)
- Enter the Apple ID used to create your Apple MDM push certificate.
Apple ID *

✓

"MDM_ Microsoft Corporation_Certificate.pem"

Upload

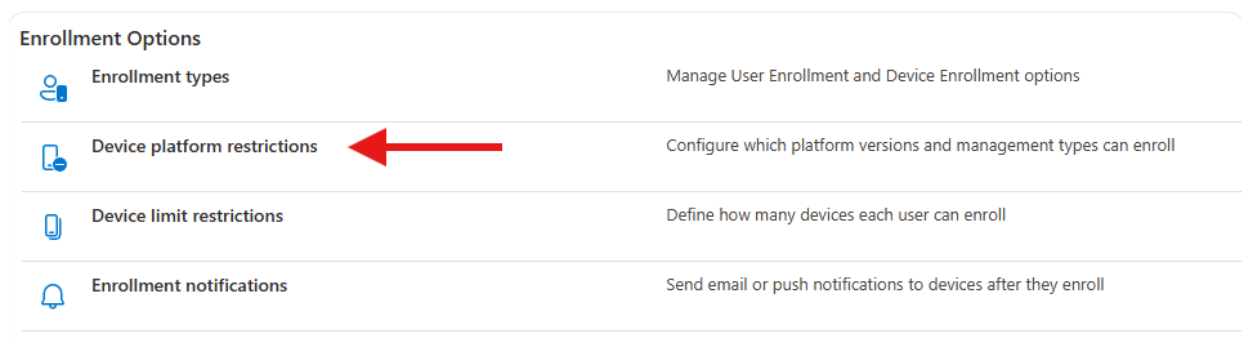

To ensure personal Windows/iOS/Android devices are allowed within your organization with separation. **Go to "Intune Admin Center Settings: In Devices > Enrollment > Apple>Device platform restrictions"**

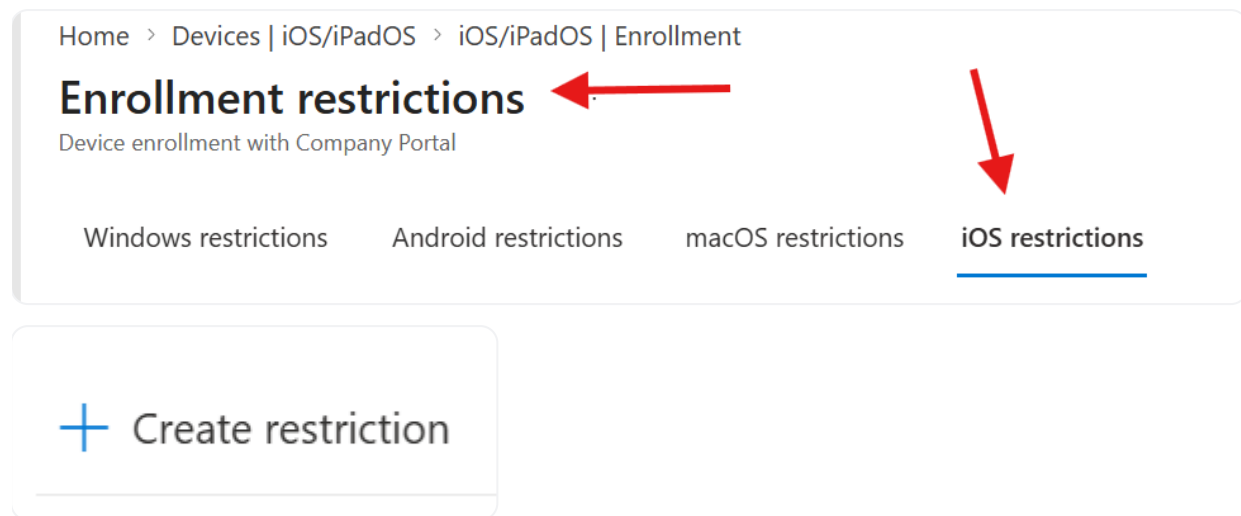

"Select" the device you want to **Enroll** - in this case "**Apple**" for IOS

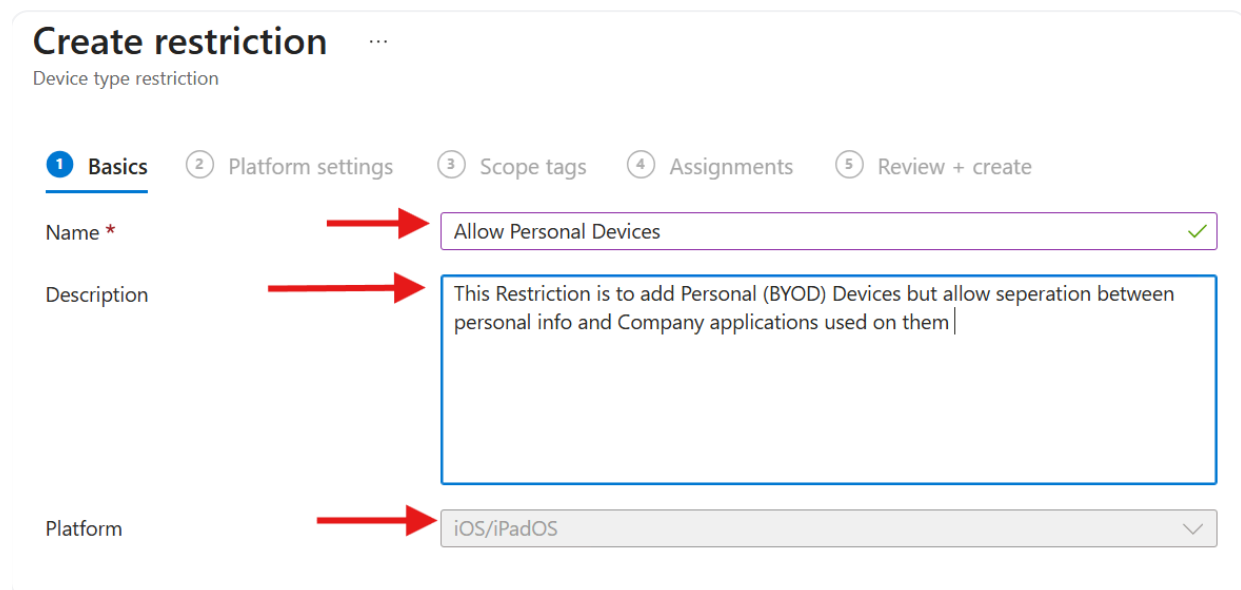

Then Scroll-down the page and go to "**Enrollment Options**" and Click "**Device Platform restrictions**"

Within "Enrollment Restrictions" Select "iOS restrictions" Click "+ Create restriction"

Create a Specific Rule and add a "Description" so other admins or for yourself know why this restriction was created"

Create a minimum OS version (e.g., 15.0) and maximum OS version (e.g., 17.0) allowed to be used to stay within compliance. then "**Allow**" Personal Devices and "**Allow**" MDM

✓ Basics **2 Platform settings** 3 Scope tags 4 Assign

Specify the platform configuration restrictions that must be met for a device enrolled with the Company Portal. Intune classifies devices as personally-owned

MDM  Allow Block

Allow min/max range:  23.3.0 ✓ 26.3.1 ✓

Personally owned devices  Allow Block

Apply this to **"All users"** Or if your In testing start with a small group like **"Intune install"** group

Create restriction

Device type restriction

Read through what is made Private to isolate the device from company activities and what the company DOES see from adding this Application to your Device

DOES SEE : Your organization can always see:

- **Device owner**
- **Device name**
- **Device serial number**
- **Device model, such as *Google Pixel***
- **Device manufacturer, such as *Microsoft***
- **Operating system and version, such as *iOS 12.0.1***
- **Device IMEI**

DOES NOT : Your organization can't see:

- **Calling and web browsing history**
- **Email and text messages**
- **Contacts**
- **Calendar**
- **Passwords**
- **Pictures, including what's in the photos app or camera roll**
- **Content of user-created documents**

Next

Next we want to download the "**Management Profile**" - Go to the Iphone's Device "**Settings**"

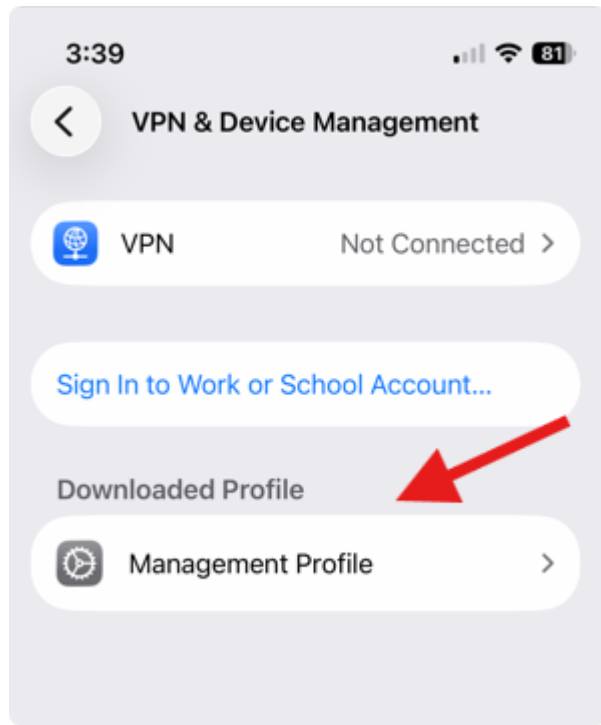

Productivity

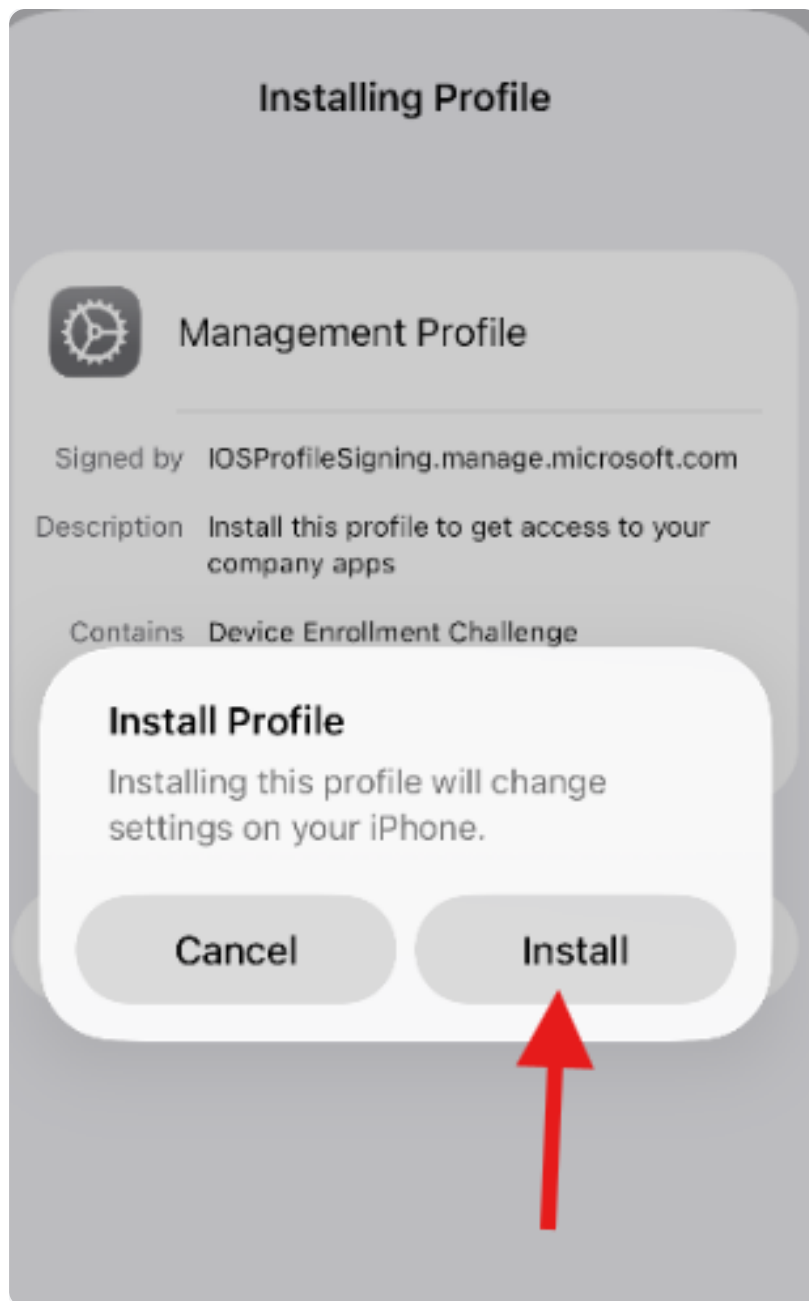

Under "**General**" Setting scroll down to "**VPN & Device Management**"

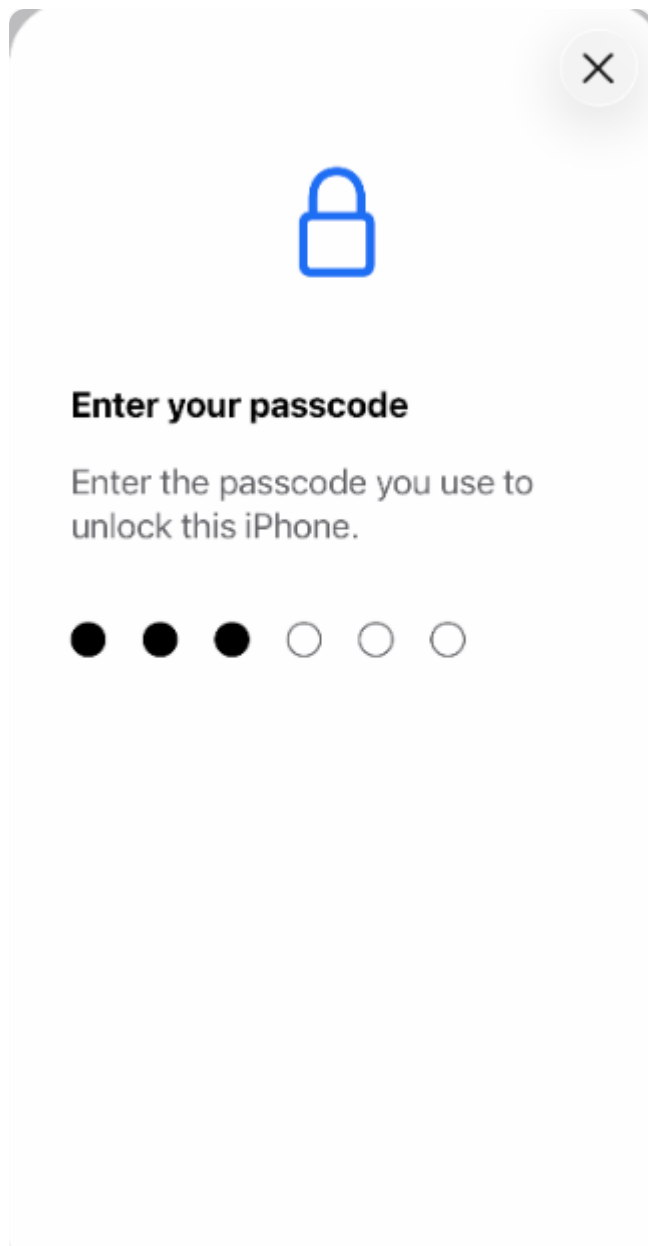

Then go into "**Management Profile**"

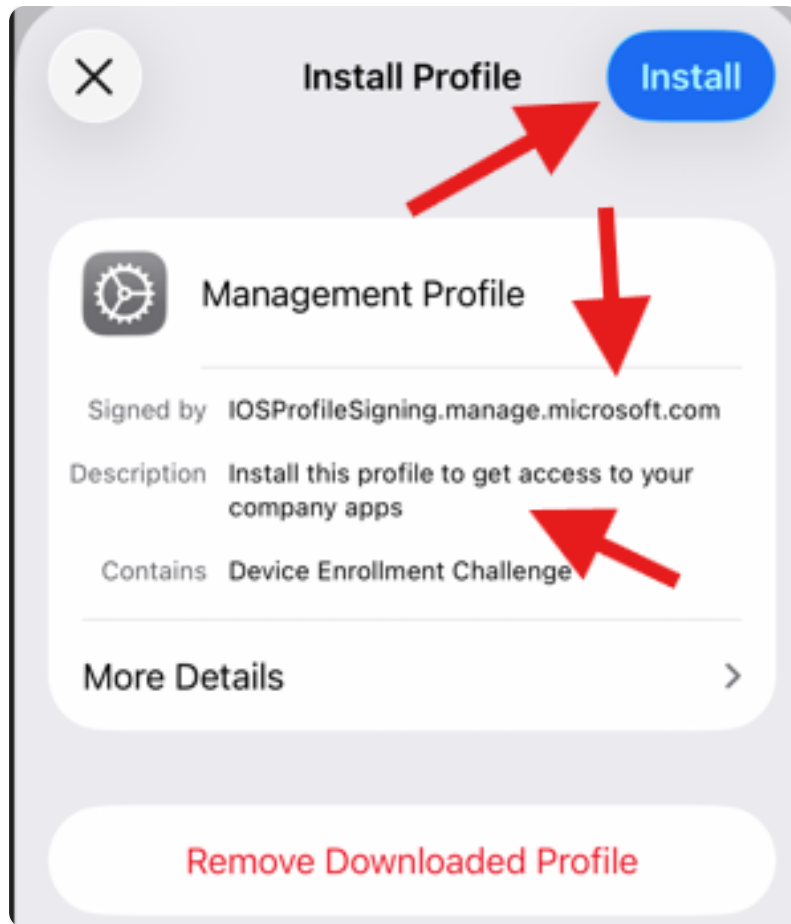

Tap the **"install" Pop-up** for the Certificate to be **trusted** to the Device

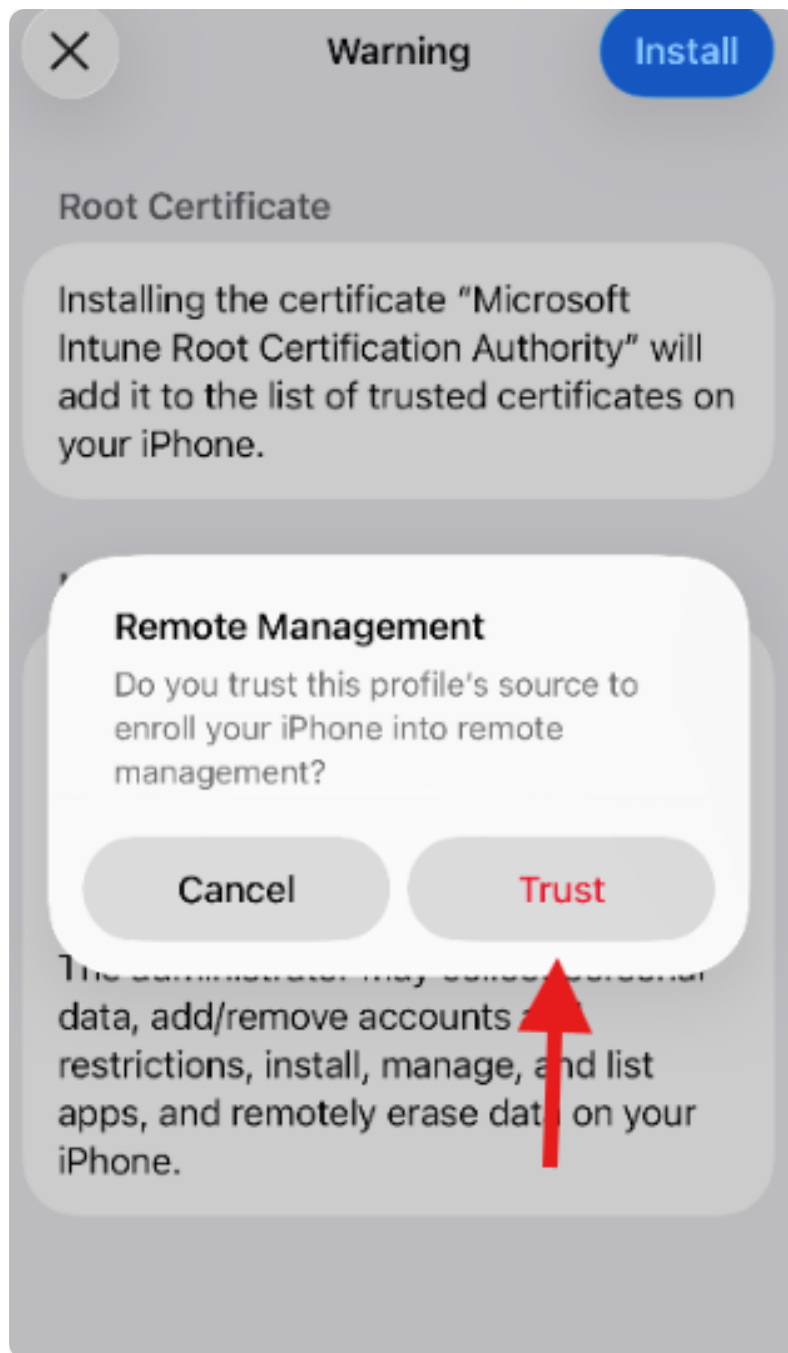

You must provide the **Passcode** to the Device to **"Allow"** installation please have the user enter their **password/PIN**

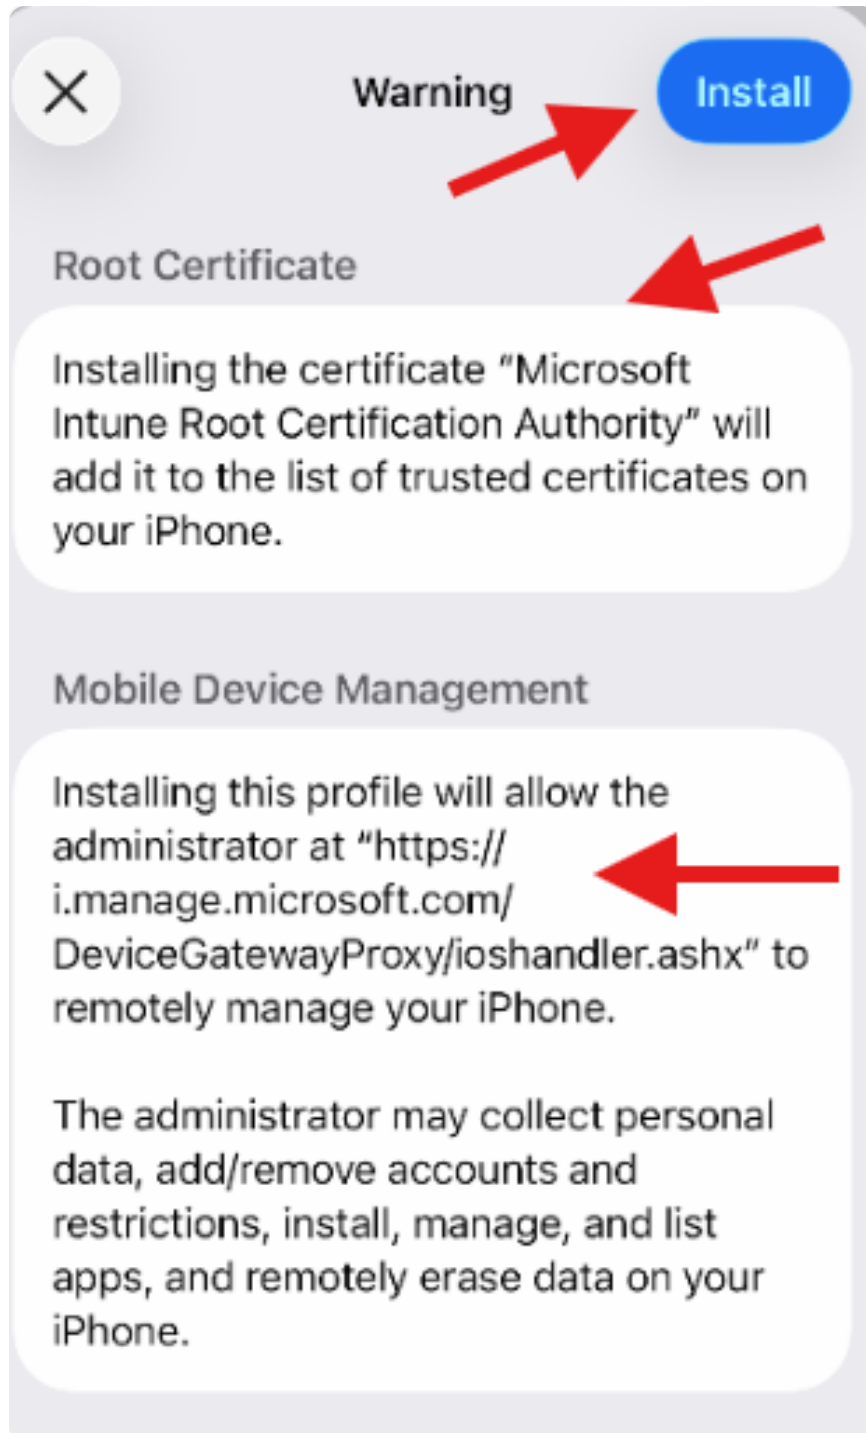

This **Install will allow the Intune service from your company** ability to install application **ONLY** through the "**Company Portal App**"

Tap on "**Trust**" this will allow for **Intune** to see the device past the network for **management**

Once the Certificate has been **Trusted** you may now tap the **"Install"**

You will be Presented with a **"Warning"**
let your users know exactly what has
been stated previously that this is
being Device restricted

Now Return to the **"Company Portal Application"** and hit **"Continue"**

3:40

contoso

Set up contoso access

Set up your device to access your email, devices, Wi-Fi, and apps for work.

- ✓ Review privacy information
